WORK EXPERIENCE

GENERAL ASSEMBLY, New York, NY   January-April 2015
Web Development Immersive | Jr. Web Developer

FLINDER APP
- Developed an application to track world events, and the nonprofit organizations that are trending in real time, based on location
- Used the NYTimes, Guidestar, and Twitter API to programmatically search current events and the relevant nonprofits, and tweets
- Styled the app using Bourbon, and Neat

DAPP APP
- Worked in an agile 5-person team with a product manager, designer, and two co-developers
- Built an authentication system using BCrypt
- Used service oriented architecture (SOA) to develop a dashboard application for the work-place, to enhance community and transparency among employees and employers

RESTAURANT APP
- Created a full CRUD Ruby app using Sinatra and a Postgresql database
- Implemented full styling using HTML, CSS, and SASS
